EXPERIENCE

Headliner | San Francisco *Mar. 2026 - Current*

Tour accounting and financial operations platform for live music touring. In production with a design-partner tour management firm.

Co-Founder & CTO

- Built the whole product as sole technical lead, from data model to UI: 26 modules across budgets, forecasts, routing, ledger, settlements, alerts, and audit; 670 merged PRs (Next.js, TypeScript, Supabase, Postgres)
- Designed its core, a spreadsheet-grade collaborative grid: realtime, agent accessible, and multi-user editing with presence and live cursors, unique cell components, and audit history; 33 cell types reused by four modules.
- Built an AI assistant that works inside the product: agents review uploaded files, navigate the user across app routes, and use 40 tools gated behind human approval with before/after diffs to automate the tour manager workflow.
- Built the realtime sync layer: first a self-hosted WebSocket server, then Supabase Realtime hardened with stale-edit guards and reconnect catch-up; about 140 tests.
- Designed, specified and reviewed everything; AI coding agents wrote most of the code, kept safe by route-layered agent.md instructions, DI patterns, ratchet lint, and layered CI gates.

KBK Management | Los Angeles/Remote *Nov. 2022 - Feb. 2026*

Tax and business services for major touring artist music productions.

Software Engineer and System Administrator

- Built an internal royalty analytics platform in Next.js, TypeScript and Supabase: 100+ database tables modeling publishing, performance-rights and recording data.
- Built an ingestion pipeline that standardizes royalty statements from publishers, labels and PROs (CSV imports, PDF OCR, standardized with dynamic field mapping), cutting days of manual reconciliation per quarterly statement.
- Sole IT administrator for 16-user Microsoft 365 tenant: identity and access in Entra ID, Conditional Access, Exchange, Teams, and Sharepoint. Deploying and managing laptops through Intune and Autopilot, including zero-touch provisioning and remote resets for distributed staff.

Revela | San Francisco *Jul. 2025 - Feb. 2026*

AI Development firm that builds scalable AI systems and infrastructure to accelerate startups.

Startup Sales Rep

- Closed $330K of contracts in Q3 by leading discovery sessions with CTOs and mapping product capabilities to AI development pain points.
- Contributed to generating $1.8M projected net-new pipeline by co-designing our Bay Area expansion playbook with a MEDDPICC framework to target VC and Startup events.
- Helped advance $1.3M into Proposal Stage in third quarter 2025 by attending and co-hosting SF events that drove ~5 high-fit leads weekly.

Tao He's Laboratory (in affiliation with UCSF) | San Francisco *Dec. 2022 - Dec. 2023*

NSF funded research lab at SFSU working on statistical learning on next generation sequencing of T/B Cell Receptor Data.

Research Assistant

- Developed a machine learning classification suite using Python and scikit-learn classification of cancer diagnoses. Achieving ~74% accuracy for cancer case/control classification with XGBoost, outperforming Random Forest (71%).

PROJECTS

MORI | React, TypeScript, Electron mkleyn.com/#mori

Built MORI (previously SWARM), an Electron, React and TypeScript desktop app running an agent harness that allows you to bring your own agents to work in parallel. Built to make managing agents feel like playing an RTS game. Visit my website to see more!

PROFESSIONAL SKILLS

Programming Languages and Frameworks: TypeScript, React, Next.js, Python, Java

Development Tools: Git, Docker, Claude Code, Neovim, Tmux, CLI, VSCode

Cloud & Databases: AWS, Supabase, PostgreSQL

EDUCATION

San Francisco State University, School of Engineering and Applied Science 2021 - 2024

B.S. in Applied Mathematics - Focus in Computer Science *GPA: 3.64*

Relevant Coursework - Data Structures, Statistical Learning, Data Mining, Probability & Statistics, Software Dev

Effective Altruism Club Founder - *President 2020-2022 | Grew recurring membership to 18 students | Held bi-weekly forums*
